

Executive Biography

Camille Caron

Director of Education and Sustainability
HP Inc.

Camille Caron is the Director of Education and Sustainability for HP's 3D Printing & Digital Manufacturing business, focused on driving a more sustainable and inclusive Fourth Industrial Revolution. In this role, she is responsible for integrating sustainability solutions throughout the business and developing programs to support the next generation of talent who will help change the way the world designs and manufactures.

A passionate advocate of lifelong learning and development, Caron's career arc has featured leadership roles in marketing, business development and product management across a diverse set of industries, all with a focus on creating amazing experiences for customers.

Prior to joining HP, Caron was Director of Product Management at GE Healthcare, where she worked on Cloud and AI solutions to improve delivery of care. She also spent several years at Autodesk, where she led efforts to introduce 3D printing into K-12 classrooms and spearheaded go-to-market for the launch of their flagship AutoCAD 360 cloud and mobile app.

She holds a degree in Psychology from Concordia University in Montreal. She is the proud mother of two daughters and now enjoys empty-nester status with her husband in Dana Point, CA.
