

Executive Biography

Ken Burns

Vice President
Commercial
Forecast 3D

Ken Burns is the Vice President, Commercial at Forecast 3D, a company which partners with customers from all industries to bring their products from 2D to 3D. After spending nearly a decade working in Additive Manufacturing for multimillion dollar brands and startups, Ken knows what truly drives the successful integration of 3D Printing into the product development lifecycle, and beyond— and it's not about chasing the latest 3D Printing buzz; it's about turning use-cases into business-cases and successfully communicating that message.

Ken has first-hand experience with SLA, FDM, PolyJet, MJF, SLS, DMLS and ProJet with two different service providers. He also worked as a Materials Business Manager for Stratasys, which provided him with insights and experience at both customer and OEM level.

Ken holds a BS in Psychology and Political Science from Pepperdine University.
