

Executive Biography

Mizuki Tanaka

President,
SOLIZE Products Corporation

In January 2020, Mizuki Tanaka was appointed President of SOLIZE Products Corporation. As an executive officer of the SOLIZE Group, which aims to become a global engineering partner for the manufacturing industry, he is responsible for the 3D printer-based prototyping business, small volume production business, and 3D printer sales and maintenance business. Based on his experience, Mizuki has been promoting the development of digital manufacturing services using additive manufacturing, in addition to contract manufacturing and equipment sales services to further expand the use of 3D printers in Japan.

Since joining INCS Inc., (currently SOLIZE Corporation) in 1999, Mizuki Tanaka has been involved in prototype mold manufacturing and mold manufacturing technology development for about 10 years, contributing to shortening mold design and manufacturing lead times and developing new solutions using digital technology. Later on, he worked as a consultant to automotive parts and precision equipment companies to improve the efficiency of their manufacturing processes. After that, Mizuki was responsible for planning, promoting and executing the SOLIZE Group growth strategy in the Strategic Planning Office. In particular, he led the integration project during the M&A of an Indian and US engineering company in 2016.
